Subject: End of Life Notice – Model 2090 CDP

Dear Valued Customer,

The AWOS 900 has been in operation since 1998 with an excellent record of performance and service. Unfortunately, several components of the AWOS 900 Central Data Platform (CDP) have become obsolete. Due to the extremely limited availability of these components, All Weather Inc. (AWI) is now issuing this end-of-life notice for the Model 2090 CDP.

When the remaining components for the Model 2090 have been completely consumed, AWI will be unable to support the repair of these units. In an effort to continue reliably supporting our customers and their systems, AWI is now offering the Model 3000 CDP as a direct replacement for the Model 2090.

The Model 3000 Central Data Platform meets and exceeds the operational standards of its predecessor, the Model 2090. Detailed specifications are enclosed for your review and are also available online at <http://www.allweatherinc.com/support/support-library/support-pdfs/>. The 3000 CDP is 100% backwards compatible with your AWOS 900 system and is fully certified by the FAA as a replacement CDP.

Should you have any questions about this product notice or would like to receive a budgetary quote for an upgrade to the 3000 CDP, please contact the AWI Sales department and a representative will be happy to help you.

Best regards,

Bob Perrin
Executive Vice President
All Weather Inc.

Subject: End of Life – 8329 Ceilometer

Dear Valued Customer:

After shipping the 8329 Ceilometer for over 24 years AWI is required, due to parts obsolesce, to communicate an end of life notice to all customers. Product support and parts will no longer be offered after June 30, 2011. Therefore, we recommend you contact an AWI representative no later than March 31, 2011 if you have requirements for either parts or service relating to the 8329 Ceilometer. After 6/30/11 AWI will no longer be able to provide parts or services for this model.

For your future ceilometer needs, we recommend our Model Number 8339 Ceilometer. The 8339 Ceilometer is a state-of-the-art cloud height indicator that has been FAA certified. The 8339 is a direct drop in replacement for your existing 8329 Ceilometer. In the interim, AWI will make every attempt to facilitate your last time 8329 Ceilometer parts and/or service purchases.

Please contact Barbara Baca at bbaca@allweatherinc.com or 916-928-1000 with any questions or concerns, as well as your last time orders or quotes.

Best Regards,

A handwritten signature in black ink, appearing to read "D. Rigby".
