

Carson City Airport

Airport Operations and Maintenance Technician Vacancy

An employee in this position works under the immediate direction and supervision of the Airport Manager. The candidate performs a variety of duties which involve maintenance of buildings, grounds, pavements, runways, taxiways, and airport snow removal. The candidate also performs preventive/routine maintenance on all airport equipment. Additional duties include, but not limited, to airfield inspections including runway, taxiways, aprons, infields, airport perimeter and other duties as assigned. The position also involves a high level of public contact.

High School diploma/GED; Associates degree, technical or vocational training preferred. Preferred: Airport Safety Operations School/Seminar, ACE, or equivalent.

Minimum qualification of three years of airport maintenance experience at a public airport. Must be able to work various hours assigned, including overtime and weekends as required.

This position has an excellent benefits package.
